

## Logging into Trimble Access

Every user must log in to the Trimble Access software the first time the system is run to define the directory that their data will be stored in. Access files will be stored in a folder under \Trimble Data\<username>.

Logging in enables you to:

- Separate and distinguish your files from those of other people who use the same data collector.
- Easily manage data between particular field crews within an organization.

Logging in is required by the AccessSync service to:

- Authenticate access to services from the field.
- Ensure that files are transferred to the correct controllers in the field, and to the correct organization, project site and folder location in the office.
- Enable you to pick up any controller and access your field project data.

From the Trimble Access menu, tap on

Tap here to log in
